

Work Experience

Senior Product Designer

Liven • Well-being Startup

November 2025 - Present

- Rapidly iterated design concepts for A/B testing, collaborated with PM on hypothesis, documents and worked closely on delivery within cross functional team
- Worked on onboarding, 20% increased signups for in-app subscription revenue effect
- Built activation onboarding to accelerate the moment, including driving a hypothesis cycle
- Redesign of main tab to establish habit loop, driving retention metrics
- Connected insights from user interviews with experiment findings to refine hypothesis

Mobile App for 2.5M+ users;
Owning design of the Flow area:
activation onboarding, habit loop

Product Designer

EGYM • Unicorn in HealthTech

September 2021 - October 2025

- Ensured the designs are scalable, met users’ and business needs. Collaborated closely with stakeholders and engineers. Transformed advanced flows and complex interfaces into simple and effective user experiences across product ecosystem.
- Quickly transitioned to a high-priority project to lead the design process of a feature rollout supportive of the core AI innovation. Redefined the existing design strategy to manage the DS migration, and successfully delivered the project within an accelerated timeline.
- Turned complex data into an actionable interactive dashboard interface for customers. Designed a holistic set of data visualization principles optimized for diverse data scenarios and use cases.
- Planned and executed UX research, conducted user interviews, usability and prototype testing.
- Incorporated accessibility (WCAG 2.2 and ATAG 2.0) best practices into the workflow while ensuring cross-team awareness.
- Delivered a redesigned BioAge, impacting +5 million monthly active mobile app users. Transformed a wide range of user measurements into clear insights indicating health status and the impact of exercise on users’ health.
- Designed the data input flow for operators efficiency and AI-assisted workflows for fitness trainers.

Tablet app for Trainers with an **AI-focused workflow**

White-label **Mobile App** for members across 7500+ locations (iOS, Android, Large-Scale Web App)

Web-based Systems for configuration and automation

Design Lead ← Designer

TEDxKyiv • Non-Profit Organization

November 2020 - December 2022

Led design team of 3 and developed design strategy; established guidelines to organize design process; worked on event identity design including brand & promotional materials and social media

Coordination of the Design Department

Education

Computer Science

Field of Study — Information Technologies

Bachelor’s Degree • National Technical University of Ukraine “Igor Sikorsky Kyiv Polytechnic Institute”

2019 - 2023

Designed a computer vision platform for the practical component of my bachelor’s qualification, aimed at enhancing UX safety for people with health conditions.

Developed a strong foundation in AI, Software Engineering, Data Analysis, and IoT, alongside profession-specific coursework in UX/UI Design, System Modeling, Scenario Analysis & Business Processes, and Web Design.

Product Strategy Program
Live Course • Reforge
2025

Product Design, Prototyping, and Testing
Course • University System of Maryland
2023

Introduction to Web Accessibility
Course • W3C
2022

Mastering Product Growth
On-Demand Course • Reforge
2024

UX Research
Course • HEC Montréal
2023

Web Design: Strategy and Information Architecture
Course • California Institute of Arts
2021
